

Lesson 1: To explore and sort minibeasts.

Date	Me	
I can define 'minibeast'.		
I can identify minibeasts' basic needs.		
I can sort minibeasts into groups based on their basic needs.		

Lesson 4: To show how a microhabitat is suitable for a minibeast.

Date	Me	
I can define 'conservation'.		
I can describe how a habitat provides for minibeasts.		
I can ask scientific questions.		

Lesson 2: To explore minibeasts in food chains.

Date	Me	
I can name what minibeasts eat.		
I can read a food chain.		
I can draw a food chain.		

Lesson 5: To observe how worms keep soil healthy.

Date	Me	
I can explain why it is important for soil to be healthy.		
I can explain what compost is.		
I can observe changes over time.		

Lesson 3: To explore plants as microhabitats.

Date	Me	
I can define 'microhabitat'.		
I can name plants that minibeasts use for shelter.		
I can use an identification sheet.		

Lesson 6: To research how minibeasts help their ecosystems.

Date	Me	
I can name different roles minibeasts can have.		
I can identify how a minibeast helps an ecosystem.		
I can carry out a research enquiry.
