

Science Investigation/Experiment Resource Disclaimer

We hope you find the information on our website and resources useful. This resource refers to the use of marshmallow creatures, paper plates, paper, and pencils when conducting investigations or experiments. You are responsible for the safe use of these resources, including following any manufacturer's instructions or guidance. We are not responsible for the health and safety of your group or environment, and so, insofar as it is possible under the law, we cannot accept liability for any loss suffered by anyone due to the use of this resource.

Food or Drink Making and Eating Resource Disclaimer

This resource is provided for informational and educational purposes only. This resource may contain food items/ingredients that pose potential allergy and choking hazards, and it may also involve the use of hot appliances or sharp utensils. Exercise caution and conduct a thorough risk assessment before use, considering allergies and health conditions. Ensure all supervising adults understand the potential risks. Learners should wash their hands before and after these activities. If used for weaning or perishable foods, follow recommended practices and consult a healthcare professional if unsure. Twinkl is not responsible for the health and safety of your group or environment. You are responsible for ensuring you know the allergies and health conditions of anyone making or consuming these products, the correct weaning guidance, and safe food storage procedures.

Marshmallow Science: Sink or Float?

Question

Will the marshmallow creatures sink or float when placed in a cup of water? Why do you think this?

Prediction

Materials

- ☐ 1 package of marshmallow creatures
- ☐ Pencil
- ☐ Cup or bowl of water
- ☐ Optional: Another liquid to try (examples: vinegar, oil, milk, etc.)

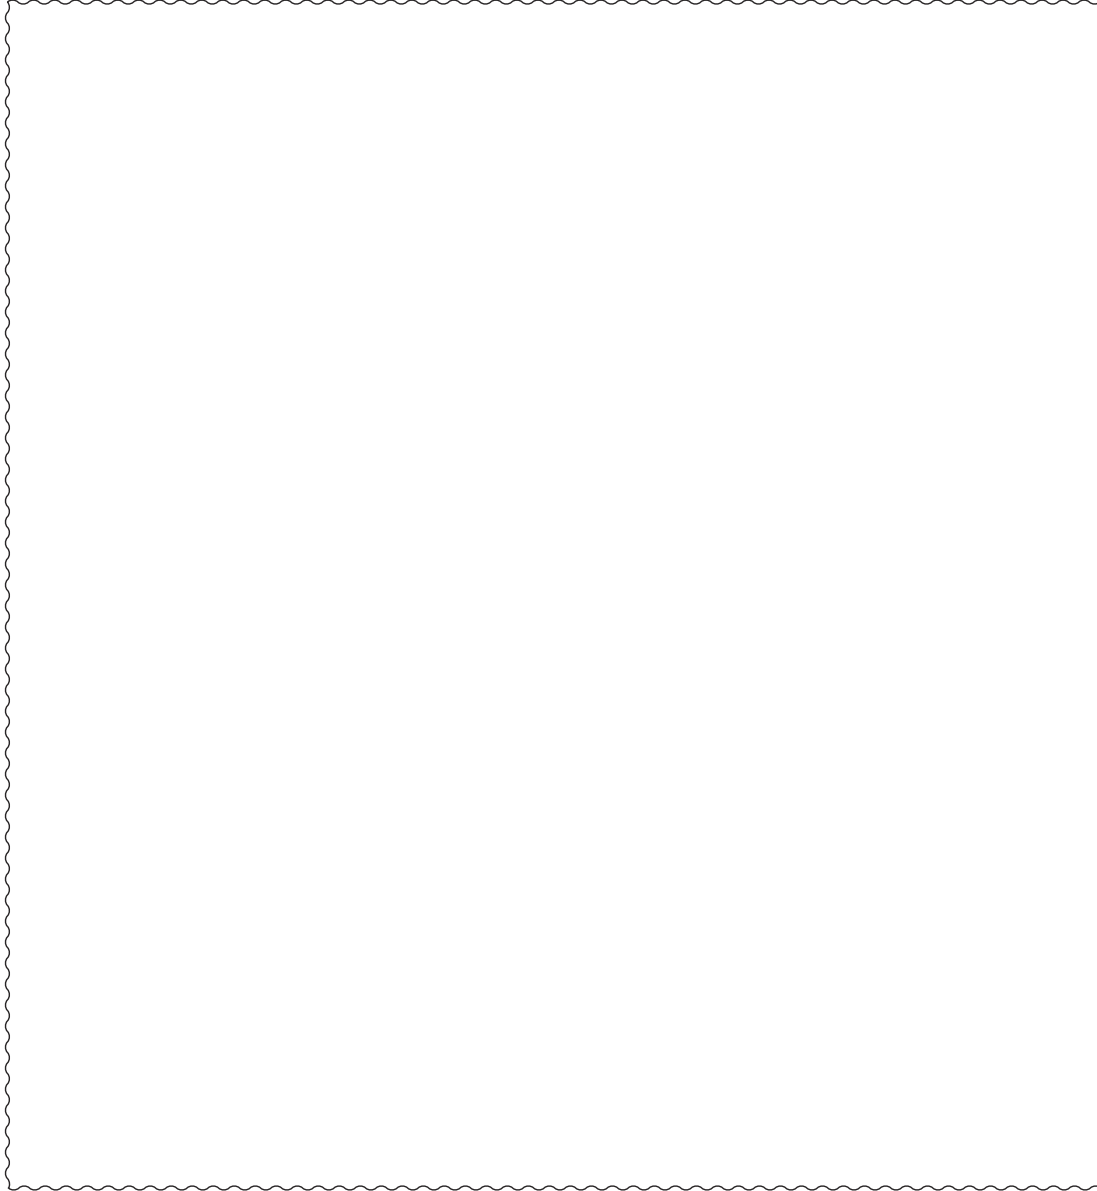

Procedures

Open the package of marshmallow creatures and put one or two in a cup or bowl of water. Predict what will happen to the marshmallow creatures in the water compared to the others left in the packaging. After making your predictions, observe whether the marshmallow creatures sink or float. Record your findings about what happened to the marshmallows in the water, including whether they sank, floated, or did something else. Discuss your observations with your classmates!

Observations

Draw or write about your observations after placing the marshmallow creature into the water.

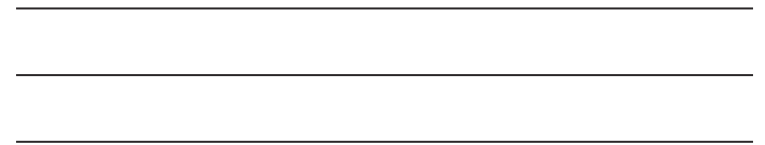

Results

What happened to the marshmallow creature placed in the water?

Conclusion

Think back to your prediction. Were you correct? What surprised you?

Optional Extension

Try placing another marshmallow creature in another type of liquid. Did it sink or float? How did it compare to the marshmallow creature placed in water?
