

Investigating Materials: Wood, Rock, Sand, and Soil Activity for PreK-K

Teacher Guidance

Objective: Students will investigate the physical properties of wood, rock, sand, and soil through hands-on exploration. They will record their findings on the corresponding activity sheets.

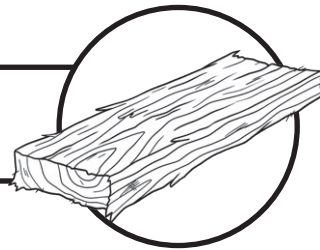

Materials List:

- activity sheets
- small, medium, and large pieces of wood and rock
- containers of sand and soil
- magnifying glass
- balance scale
- cubes or blocks
- ruler
- water container

Instructions:

1. Set up four labeled investigation centers.
2. Place the corresponding activity sheet and pencils in the center.
3. Have students rotate through the centers and complete their activity sheet.
4. Once students have completed the stations, discuss their observations.

Investigating Materials: **Wood**

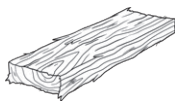

Describe It:

Mark the word that describes the size of the wood. Then circle all the words that describe the wood.

small

medium

large

light	heavy	hard
soft	bumpy	shiny
smooth	long	short

Write your answer on the line.

Measure It:

Measure the wood using a ruler.

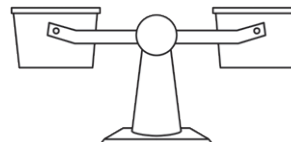

The wood is _____ inches long.

Weigh It:

Weigh the wood using cubes or blocks.

The wood weighs _____ cubes/blocks.

Predict:

Predict if the wood will sink or float and mark your choice. Place the wood in water and mark what happens.

I predict the wood will:

sink ☐ float ☐

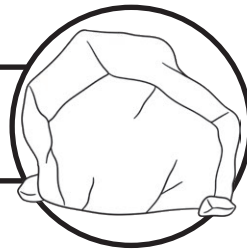

The wood:

sank ☐ floated ☐

Draw It: Draw your observations in the space below.

Investigating Materials: **Rock**

Describe It:

Mark the word that describes the size of the rock. Then circle all the words that describe the rock.

small

medium

large

light

heavy

hard

soft

bumpy

shiny

smooth

long

short

Write your answer on the line.

Measure It:

Measure the rock using a ruler.

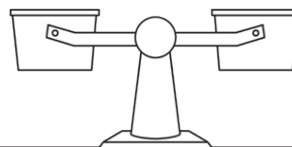

The rock is _____ inches long.

Weigh It:

Weigh the rock using cubes or blocks.

The rock weighs _____ cubes/blocks.

Predict:

Predict if the rock will sink or float and mark your choice. Place the rock in water and mark what happens.

I predict the rock will:

sink ☐

float ☐

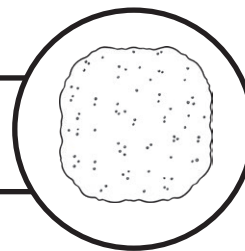

The rock:

sank ☐

floated ☐

Draw It: Draw your observations in the space below.

Investigating Materials: Sand

Describe It:

Mark the word that describes the color of the sand. Then circle all the words that describe the sand.

red

blue

green

brown

black

white

yellow

orange

pink

purple

light

heavy

hard

soft

bumpy

shiny

smooth

long

short

Look at It:

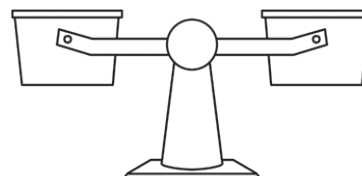

Use a magnifying glass to look at the sand.

Draw what the sand looks like under the magnifying glass.

Weigh It:

Weigh the sand using cubes or blocks and write your answer on the line.

The sand weighs _____ cubes/blocks.

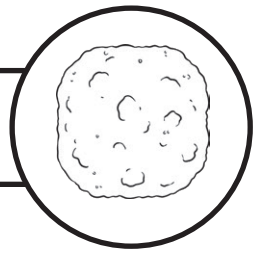

Predict:

Predict if the sand will sink or float and mark your choice. Place the sand in water and mark what happens.

I predict the sand will: **sink** ☐ **float** ☐ The sand: **sank** ☐ **floated** ☐

Draw It: Draw your observations in the space below.

Investigating Materials: **Soil**

Describe It:

Mark the word that describes the color of the soil. Then circle all the words that describe the soil.

red

blue

green

brown

black

white

yellow

orange

pink

purple

light

heavy

hard

soft

bumpy

shiny

smooth

long

short

Look at It:

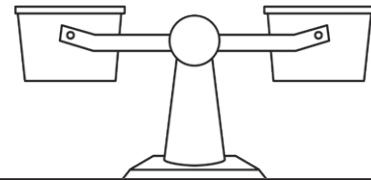

Use a magnifying glass to look at the soil.

Draw what the soil looks like under the magnifying glass.

Weigh It:

Weigh the soil using cubes or blocks and write your answer on the line.

The soil weighs _____ cubes/blocks.

Predict:

Predict if the soil will sink or float and mark your choice. Place the soil in water and mark what happens.

I predict the soil will: **sink** ☐ **float** ☐ The soil: **sank** ☐ **floated** ☐

Draw It: Draw your observations in the space below.
